

# ASSEMBLY INSTRUCTIONS

1. Select a level area to operate game and allow room to form a line and a safe distance between player and spectators.
2. Assemble framework per steps; reference diagram below when necessary.

Steps: 1) Open box and remove all pieces.

2) Separate the pieces into groups, per the legend (A,B,C,D,E), making sure that you have all of the necessary pieces.

3) Starting with the lower corner pieces (B), position per diagram.

4) Insert leg pipes (E).

5) Fit one crimped pipe (C) into one standard pipe (D) and insert each end into the lower corner pieces (B).

6) Repeat this step two more times to form the sides.

7) Place upper corner pieces (A) on top of each side post, facing inward.

8) Fit the last crimped pipe (C) and standard pipe (D) together and insert each end into the upper corner pieces (A).

9) Tighten each screw by hand (no tools necessary).

10) Attach the canvas to the frame, using the attached Velcro straps.

\*visit [www.AmusementRental.com](http://www.AmusementRental.com) to see a demonstration video for your frame game

3. In heavy winds, use stakes or weights to secure unit or take down until the winds slow.

## PIECES

(2) A - upper corners:

(2) B - lower corners:

(4) C - crimped pipe:

(4) D - standard pipe:

(4) E - leg pipe (style may vary):
